EDUCATION

The University of Texas at Dallas

Richardson, TX | Aug 2022 – May 2026

Bachelor of Science in Computer Science

- **Coursework:** Machine Learning, AI, Advanced Algorithms, Computer Architecture, Automata Theory, UNIX
- **Leadership:** Alpha Kappa Psi, Vice President of Service

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Go, Java, Swift, SQL, Rust

AI / ML: PyTorch, TensorFlow, SciKit-Learn, LangChain, Pinecone, GPT APIs; RAG pipelines, LLM evaluation, prompt engineering

Infra & Systems: AWS, GCP, Docker, Kubernetes, PostgreSQL, MongoDB, Supabase, Firebase, Linux, Bash, Git

Web & Mobile: React, React Native, SwiftUI, Node.js, Django, Express, REST APIs

EXPERIENCE

Shake

Nov 2025 – Present | Remote

Co-Founder & Engineer

- Built real-money social **prediction-markets** iOS app in **Swift/SwiftUI**: user-created markets priced by a custom **LSMR automated market maker**, friend wagers, Polymarket-style price chart, and **Supabase** backend (wallet + RLS, payout RPC, For-You feed, deep-link invite flow)
- Designed and shipped 8 schema migrations and real-time balance updates; iterated on user feedback through closed beta with real-money payouts

The Way & True Ventures

Summer 2025 | San Francisco, CA

Software Developer & VC Fellow

- Owned the production **RAG pipeline** for **Archive Assistant** (15,000+ users): corpus chunking, Pinecone vector index tuning, retrieval reranking, LLM orchestration via LangChain
- Tracked latency/throughput/retrieval recall; tuned batch vs. streaming for cost and p99 performance; built observability tooling for silent retrieval degradation
- Assessed True Ventures portfolio companies for AI implementation opportunities

GGWP (BuildSpace S5 – a16z-backed)

May – Aug 2024 | San Francisco, CA

Software Engineer & Founder

- Designed and built a full-stack social app: **Django** REST API, **Supabase** (PostgreSQL) data layer, **React Native** client — beta-tested with **150+ users**; selected for **a16z BuildSpace S5** cohort

Portages Health

June – Aug 2024 | Remote

Product Developer

- Built mental-health tracking app in **React Native + Firebase**; ran 40-customer discovery interviews; owned full product lifecycle

HelloAppt

June – Aug 2023 | Allen, TX

Full Stack Developer

- Designed data model and **Django** REST API for scheduling platform supporting **30+ service providers**; delivered backend and React frontend from scratch

PROJECTS

Prediction Market Trading Bot (Kalshi) | Python, TypeScript, SciPy, Supabase

May 2026 – Present

- Built an automated market maker quoting both sides of daily high-temperature markets on a **CFTC-regulated exchange**; generated **+20% return (+\$968) over 1,142 trades** by capturing payoff asymmetry rather than directional accuracy
- Deployed a live real-money strategy exploiting favorite-longshot bias in hourly BTC markets (**164 trades, 75% win rate**); engineered RSA-PSS-signed order execution, Kelly-criterion sizing pegged to live account equity, and parallel scoring of five strategy variants against the market's own Brier score

FluxServe | Python, PyTorch, FastAPI, torchao, PEFT

Jun 2026

- Production multi-LoRA inference server for **FLUX diffusion models**: FP8 quantization via torchao, **torch.compile**, recompilation-free LoRA hot-swap via PEFT
- **FastAPI** REST API (/generate, /benchmark, /loras) with p50/p95 latency reporting, peak VRAM tracking, Prometheus metrics, and Docker/NVIDIA GPU deployment

TrendSent | React, Node.js, GPT API, MindsDB

Nov 2023

- ML pipeline: SEC filing parsing → sentiment scoring → DCF projection; served comparative financial analytics across competitors
- **3rd place – Goldman Sachs Challenge, UTD** (1,200 participants)

Midass | React, Node.js, GPT API, Hume.AI, MindsDB

Oct 2023

- Real-time CV facial-expression analysis fused with market signals; **3rd place – UC Berkeley Cal Hacks** (1,600+ participants)
