EDUCATION

The University of Texas at Dallas

Bachelor of Science in Computer Science

Richardson, TX

Aug 2022 - May 2026

- **Relevant Coursework:** Advanced Algorithm Design & Analysis, Computer Architecture, Machine Learning, Artificial Intelligence, Automata Theory, Discrete Math, UNIX
- **Leadership:** Alpha Kappa Psi, Vice President of Service

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Go, Java, SQL, Rust

ML / Inference & Retrieval: LangChain, Pinecone (vector index), GPT APIs, Claude API, PyTorch, TensorFlow, SciKit Learn, Hume.AI, MindsDB; prompt engineering, LLM evaluation

Infrastructure & Systems: AWS (SageMaker), GCP, Docker, Kubernetes, PostgreSQL, MongoDB, Supabase, Linux, Bash, Git

EXPERIENCE

The Way & True Ventures

Software Developer & VC Fellow

Summer 2025

Remote

- Owned the production **RAG serving pipeline** for **Archive Assistant** (15,000+ users): corpus chunking, embedding generation, Pinecone vector index tuning, retrieval reranking, and LLM orchestration via **LangChain**
- Deployed and operated inference on **Amazon SageMaker** - monitored latency, throughput, retrieval recall, and cold-start behavior; tuned batch vs. streaming embedding generation for cost and throughput tradeoffs
- Built **LLM evaluation framework** to measure output fidelity and detect silent retrieval degradation; integrated GCP for auxiliary cloud workloads

GGWP (BuildSpace S5 - a16z-backed)

Software Engineer

May 2024 - Aug 2024

San Francisco, CA

- Designed and built the full backend stack for a social app: **Django** REST API, **Supabase** (PostgreSQL) data layer, and a **React Native** client - beta-tested with **150+ users**
- Implemented data modeling, API design, auth, and deployment from scratch; selected for the **a16z BuildSpace S5** cohort
- Iterated on the system based on production usage and direct user feedback

Portages Health

Product Developer

June 2024 - Aug 2024

Remote

- Built a mental-health tracking solution using React Native and Firebase, engaging 40 customers in product discovery and feature design
- Conducted user interviews and translated findings into shipped product features

HelloAppt

Full Stack Developer

June 2023 - Aug 2023

Allen, TX

- Designed the data model and Django REST API for a scheduling system supporting **30+ service providers**, engineered to scale to hundreds of customers
- Built the full stack - backend, API, and React frontend - on the MERN stack from scratch

PROJECTS

TrendSent | React, Node.js, GPT API, MindsDB

Nov 2023

- Built an ML pipeline integrating SEC filing parsing, sentiment scoring, and DCF projection through a Node.js + MindsDB orchestration layer; served comparative financial analytics across competitors
- **3rd place - Goldman Sachs Challenge, UTD** (1,200 participants)

Midas | React, Node.js, GPT API, MindsDB, Hume.AI

Oct 2023

- Built a real-time inference system combining computer-vision facial-expression analysis with market signals to drive crypto-trading decisions; integrated Hume.AI for emotion inference and a MindsDB layer for predictive modeling
- **3rd place - UC Berkeley Cal Hacks Infiniti** (1,600+ participants)

Take10 | React, Hume.AI, GPT, Python

Nov 2023

- Real-time stress inference system with dynamic GPT-driven task re-ranking; integrated Hume.AI for affect signals and served re-ranked task ordering through a Python backend
- **2nd place - HackUNT** (100 participants)
